

12 Questions to Ask Yourself about AI and Microlearning

Rich Media

- 1 How can I make my training **more clear or engaging** by adding high-quality media?
- 2 How can better media **increase the fidelity** of the training?
- 3 Do I have an idea I could **quickly prototype and test**?

Adaptive Microlearning

- 4 Would it be helpful to **segment** my audience?
- 5 How are the **needs** of the segments different?
- 6 How can I **customize content** to deliver different experiences to the segments?

Dialogue-Driven Content

- 7 Do I have places where a truly **individualized** learning experience will add value?
- 8 Can I embed an **AI chatbot** into my microlearning in a way that adds value for the learner?
- 9 Can I use **interaction with AI** as a teaching strategy with my learners?

Simulation

- 10 What is the most **high-stakes** performance issue for a given role?
- 11 What **skills** are most critical to that **performance**?
- 12 How can I create an **environment** that allows learners to apply their knowledge and skills in a realistic way?
